WE NEED THEM NOW!

A recent visit to the movies with the Man who came to dinner as the attraction, convinces me that what the country needs is more and better (if that be possible) Monty Wooleys. This doesn't mean underthings, in the language of our principal Ally, but that master of polite insult who takes the part opposite Bette Davis, mostly in a wheel chair. He is the cure for our inferiority, our compulsion to be polite to our foes, our wish to spare people's feelings. He never heard of the Beatitudes but he can tell the bore, the pest, the insincere time waster, and public and other enemies where to go. If Casper Milquetoast could do what he does, he would have 90 percent enemies and could grow a double chin. These he-wooleys would save us from ourselves and might lessen the peristalsis of our compassion in an emergency.

MALAYA

Years ago, more than a generation ago, I landed in the middle of the night in a small row boat, at the tiny settlement of Malacca. There were only three Europeans there, and there was no railway then, and I had come from Singapore in a wretched little steamer. From Malacca I walked, keeping an eye out for tigers and leopards, and rode when I could in native horse-drawn gharries; finally I wound up in Ipoh by way of Kuala Lumpur, on my way to Burma. Fifteen years later on returning from Java and Bali, I was able to make the three-day journey from Singapore to Bangkok by rail, a marvelous improvement in transportation. This was Malaya, and when I was back in the United States I discovered almost no one had ever heard of it. Now the fate of the world will be decided there, and who has not heard of it?
